

# Holy Name RC Primary School

2020 - 2021

Issue One

This week in Year Six we have started looking at the book, 'Here We Are'. The children have loved learning about the Earth and thinking about how lucky we are to have certain people in our lives. On Friday, the children all wrote a letter to their favourite person and I loved hearing the amazing stories that your children have shared.

In maths, we started looking at place value and we are now working with numbers up to ten million. We also used the iPads to play on My Maths. The children have all taken their details home this weekend so they can practice their skills at home.

Our science topic this half-term is light. We looked at natural and man-made light sources and how light travels. The children are going to be creating a presentation about how light travels and how it reflects next lesson. We will be uploading these onto our class page and blog.
